PRELIMINARY
All data are approximate values. We reserve the right to make technical alterations. Final drawings have to be made before starting with construction work.

Customer Release Acknowledgement
I agree to the preliminary as the basis for implementation planning. We have been informed of the importance of meeting all notes and requirements. Sirona does not check and neither compliance with on-site requirements and planning specifications, such as structure engineering, structural, electrical, preparation for installation and electrical installations. We will control the implementation and monitoring of on-site preparations for installation to qualified specialists.
