Biomedical International presents integrated medical, dental, laboratory, sterilization, imaging and modular healthcare solutions.

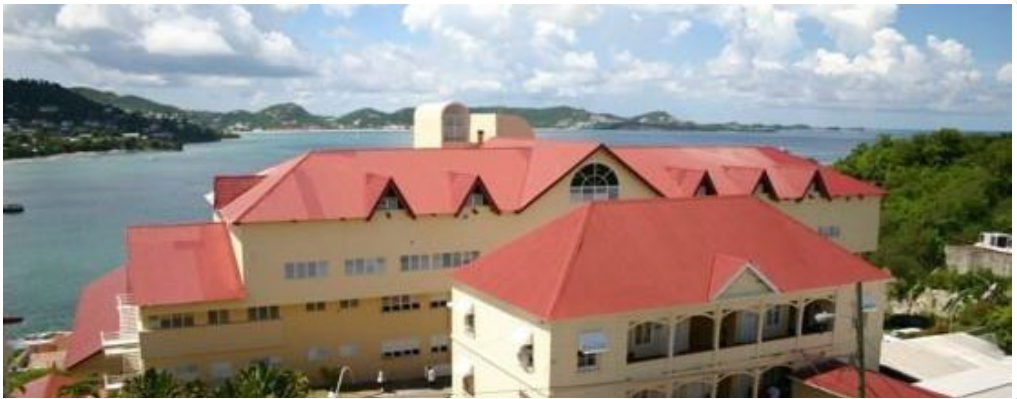

Executive overview

Biomedical International is positioned as a one-source partner for equipment, infrastructure, installation and lifecycle support.

Established in Florida in 1982 and headquartered in Miami, Biomedical International supports hospitals, clinics, laboratories and dental practices with a mix of product supply, turnkey execution and service.

- One-source coverage for medical, dental and laboratory equipment and consumables
- Turnkey capability across imaging, OR, ICU, CSSD, laboratory, medical gas and specialty spaces
- Factory-trained field engineering support, preventive maintenance and service contracts
- Regional operating experience tailored to island logistics and healthcare infrastructure realities

40+ years

Operating history in healthcare supply and project delivery

193

Hospitals and clinics cited in the served market

20,338

Beds referenced across public and private facilities

Miami, FL

Regional commercial base for customer access and coordination

Regional footprint & healthcare market coverage

43 years of service over 33 countries in the Caribbean and South America

Healthcare segments served

114 public hospitals

17,750 beds

28 private hospitals

1,165 beds

36 private clinics

649 beds

Combined total cited in the source deck:
193 hospitals and clinics | 20,338 beds

Primary regional focus

Caribbean markets listed in the original deck include Jamaica, Barbados, Cayman Islands, Turks & Caicos, Antigua & Barbuda, St. Kitts & Nevis, Dominica, Grenada, Curacao, Trinidad and others.

Additional reach noted

Central and South America entries specifically cited:
Belize, Guyana and Suriname.

Jamaica	Barbados	Antigua & Barbuda	Turks & Caicos	
Cayman Islands	Dominica	Grenada	St. Lucia	St. Vincent
Trinidad & Tobago	Belize	Guyana	Suriname	

What Biomedical International delivers

Biomedical International is driven by a commitment to deliver dependable, high-quality medical technology solutions that strengthen healthcare providers and improve patient care. We are motivated by long-term partnerships, technical excellence, and the responsibility to help hospitals and clinics operate with confidence, efficiency, and trust.

Diagnostic imaging

CT, MR, digital X-ray, mammography, C-arm and imaging support infrastructure

Operating room & ICU

OR tables, lights, booms, anesthesia, monitoring, ventilation and critical care support

CSSD / sterilization

Washers, sterilizers, ultrasonic cleaning, workflow stations and consumables

Laboratory & pathology

PCR, blood banking, biosafety, temperature control and general lab equipment

Dental practice & labs

Chairs, imaging, intraoral systems, CAD/CAM and dental laboratory solutions

Medical gas & specialty infrastructure

Oxygen plants, utility planning, site readiness and project integration

End-to-end turnkey project delivery

Working with you from your initial assessment phase till full project completion, Biomedical International is a committed experienced partner to ensure your equipment projects are brought from Idea to reality.

Execution features highlighted in the original materials

- Architectural design, workflow planning and 3D project visualization support
- Certified biomedical engineers for pre-install planning, installation and commissioning
- Training for both technical teams and clinical users during handover
- Preventive maintenance and post-warranty service programs for long-term uptime

Selected represented brands

With over 500 manufacturers at our reach, Biomedical International is a one stop supplier for each section the hospital environment including, ICU, OR, CSD, Emergency and Lab

Partnering with trusted global manufacturers to deliver proven technology, reliable performance, and long-term value to healthcare providers.

Modular, mobile & disaster-response solutions

Biomedical International also presents short- to mid-term healthcare deployment options for urgent and remote needs.

Designed for speed, resilience and flexibility

- Self-contained clinic modules with solar power capability and independent utility support
- Scalable units that can be combined to form field-hospital style solutions
- Pre-designed and prefabricated approaches intended to accelerate deployment while controlling quality
- Use cases across primary care, trauma, emergency medicine, women's health, pediatrics, imaging and dialysis

Primary care • Trauma • Emergency • Women's health

Pediatrics • Imaging • Dialysis • Infectious disease

Engineering, installation & lifecycle service

Working with our team of biomedical engineers, Biomedical International is committed to giving optimal preventive maintenance and corrective care to ensure you get the most out of your investment for the long term.

Operational support themes repeatedly highlighted

- Factory-trained field engineers and technical project support
- Preventive maintenance programs structured for continued equipment performance
- Service-contract options after the initial warranty period
- Focused support for imaging, OR, ICU, sterilization, dental and laboratory environments

REPRESENTATIVE EXPERIENCE

Turn Key Highlights

With 43 years of experience successfully bringing our clients vision to fruition, Biomedical International is a leader in full turn key equipment packaging and project execution

Cornwall Regional Hospital | Jamaica

Dec 2024 | Project value: \$900,000

Turnkey CT installation featuring the United Imaging uCT 760 and Bayer Medrad Stellant Dual Contrast Injector.

National Public Health Laboratory | Turks & Caicos

Jan 2022 | Project value: \$300,000

Laboratory expansion package including PCR testing, blood banking centrifuges, biosafety cabinets and ultra-low temperature storage.

Tortola | Peebles Hospital

Nov 2016 | Estimated project value: \$2,800,000

Complete remodeling and equipment upgrade for central sterilization and operating theater

REFERENCES

Proven project track record

The source deck includes projects spanning public health systems, hospital upgrades, diagnostic imaging, CSSD modernization and emergency response.

2020 | Barbados

Queen Elizabeth Hospital

\$400,000

Turnkey CSSD renovation and upgrade with design, planning, provision and installation.

2020 | OECS member states

General Hospital Equipment

\$161,125.57

Ventilator systems supplied across St. Kitts & Nevis, Anguilla, Antigua & Barbuda, St. Lucia, St. Vincent, Dominica, BVI and Montserrat.

2015 | British Virgin Islands

Peebles Hospital

\$2,800,000

Radiology, CSSD and OR / surgery department design, planning, provision and installation.

2013–2014 | Jamaica

Government sterilization modernization initiative

\$2,000,000

Island-wide modernization with multiple STERIS steam sterilizers.

2012 | Barbados

Queen Elizabeth Hospital

\$850,000

Site planning, design, provision and installation of a GE Innova 3100 IQ cath laboratory.

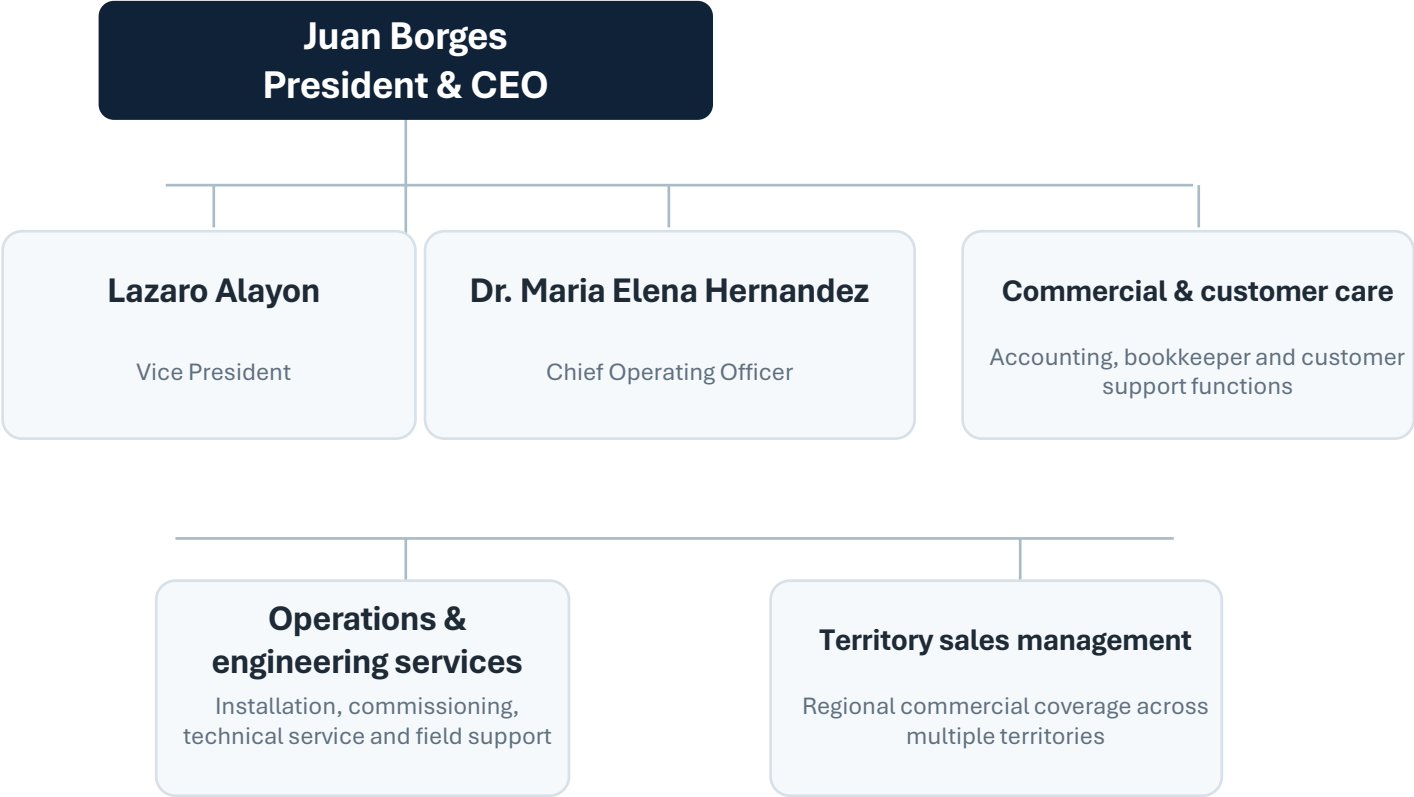

2000–1994 | Regional references Grand Cayman, Jamaica, Guyana, St. Croix, Barbados & Curacao Multiple references

Long-term experience across new hospital additions, cardiology, sterilization, anesthesia and general hospital equipment projects.

Leadership & operating structure

A simplified client-facing view of the organization based on the original presentation’s organizational layout.

Why clients choose Biomedical International

- More than four decades of regional healthcare market experience
- One-source execution across equipment, design coordination, installation and service
- Track record with ministries of health, public hospitals, private providers and laboratories
- Solutions tailored for critical care, imaging, sterilization, laboratory, dental and modular care environments
- A service-led approach intended to protect uptime and long-term operational value
